DataGuardian™

DataGuardian™ is plug and play security for USB . Finally, there's a solution to keep your data safe without the headaches. There nothing to install, no public/private partitions to manage and no administrative right required. DataGuardian provides password access that runs from hardware (on-chip). Also, DataGuardian protects you from all auto-run based malware attacks; the most common form of malware attacks affecting flash drives today.
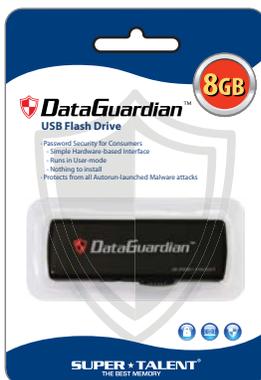

Features

- Password Security made easy
- Simple Hardware-based interface
- Runs in User-mode
- No software to Install
- Protects from all Autorun-launched Malware attacks
- Capless design - slides to reveal USB connector
