

■ USB Oscilloscope/Spectrum Analyzer

SuperTalent's USB Oscilloscope/Spectrum Analyzer is a portable multi-function measuring equipment that can capture external signals and present its waveform and spectrum with a proprietary software in various situations.

It's a low-cost and convenient choice to replace a lot of laboratory equipment for electrical/computer engineering students, amateurs and enthusiasts.

Specifications

Dimension	86x61x21mm
Max realtime sample rate	100kSa/s
Interface	USB
Operating System	Windows
Channel	2
Max Test Voltage	-10V~10V
Trigger Type	Edge (Rising / Falling)

Voltage Measurement/Spectrum Display
