

■ Storage POD Enclosure

Introduction

Put new life into your 2.5" disk drives by moving them into a USB 3.0 Storage POD Enclosure. Say goodbye to the USB 2.0 bottleneck; the new Storage POD Enclosure enables your 2.5" to deliver true performance with almost zero degradation. Completely powered by the USB cable, the Storage POD Enclosure enables you to achieve a new level of portability by eliminating the need for a power cable and it's easy to install. The Storage POD Enclosure requires only 2 screws. Inside this solid-metal framed enclosure, your drive now floats completely suspended in a specially designed rubber grommet that protects it from shock and vibration on all 6 dimensions. It is this specially designed grommet that differentiates this enclosure solution from the pack and gives it an undeniable feeling of quality and workmanship.
