

p/n: **WB200UX6G9**

Description

The WB200UX6G9 is a 6GB (3x 2GB) triple-channel kit of DDR3-2000 DIMMs. It was developed specifically for Intel X58 / Core i7 based enthusiast motherboards that support triple-channel DDR3 memory. This kit has been tested and is guaranteed to operate at 2000MHz at 9-9-9-28 latencies at 1.65 volts. It has been tested as a triple-channel kit in a popular triple-channel enthusiast motherboard to ensure ultimate reliability, compatibility and performance.

Our hyper-efficient new Chrome series heatsinks wick away heat from the memory components, boosting maximum performance and extending the life of the components.

Module Features

- 3x 240-pin DDR3 DIMMs
- Non-ECC, Unbuffered
- 6GB kit (3x 256Mx64)
- DDR3-2000, 9-9-9-28 latencies
- Dual rank
- Chip Architecture: 2x 16 chips, 128Mx8
- Hyper-efficient Chrome heatsink
- SPD*: DDR3-1600, 9-9-9-27 latencies
- Super Talent Lifetime Warranty

Test Specs

These modules are tested and guaranteed to operate at these specs.

- DDR3-2000 / PC3-16000
- 9-9-9-28 Latencies (CAS, tRCD, tRP, tRAS)
- Test Voltage: 1.65V
- Tested as a triple-channel kit in a 3-channel motherboard*

Specifications subject to change without notice. You may achieve better or worse results depending on your other system components. * All triple-channel overclock kits are tested with three modules installed; rated specs are not guaranteed for six modules in a system. © Copyright 2009, Super Talent Technology.
